

SECUMAX 150

THE KNIFE THAT PRACTICALLY DOES IT ALL.

THE SAFER WAY TO CUT.

**martor**

# SECUMAX 150

NO. 150001

Original size

#### 3-in-1 blade head

The SECUMAX 150 fits like a glove. It's so comfortable to hold, that it feels like an extension of your hand. With it you can cut cardboard, split tape, open plastic strapping... you can even scrape residue off surfaces.

#### Concealed blade

This safety knife doesn't need a sharp tip to be a smart cutter. The cutting head is flat and relatively small, the two noses on either side are the perfect length to protect, and both cutting edges are wide enough to safely and effortlessly cut 2-ply cardboard.

#### Clever guide surfaces

Another reason why the SECUMAX 150 can cut through cardboard so easily? The guide surfaces located right at the front of the cutter help you to cut on an angle. Angled cutting means less material resistance!

#### Ergonomically shaped

Right handed? Left handed? It's really all the same. The SECUMAX 150 fits perfectly in any hand. Gently arching outer edges, coupled with light ribbing and a low weight, ensure an ergonomic experience.

#### Disposable and also sustainable

The SECUMAX 150 is a disposable knife. The blade head is non-replaceable. It was therefore especially important to us to make the product as sustainable as possible. The result: 80% recycled plastic with fibre-glass reinforcement.

## Flexible and sustainable at work.

MARTOR's SECUMAX 150 provides you with one tool for three tasks: cutting, scraping and splitting. The two cutting edges are concealed to provide optimum protection for users and packaged goods. The blade head of this 26 g safety knife is firmly attached to the ergonomic handle and cannot be changed. The fibreglass reinforced SECUMAX 150 comprises at least 80% recycled plastic.

## PRODUCT FEATURES

### Technical features

	Maximum safety		Disposable knife
	Abrasion resistant		Very ergonomic
	2-times usable blade		Cutting depth
	Scraper width		Tape splitter
	For right and left hander		Lanyard hole
