

SECUPLUS 210

MASTERING THE FORWARD ROLL. WITH OPENING FOR FINGERS.

THE SAFER WAY TO CUT.

martor

SECUPLUS 210

NO. 210001

70% of the original size

Bladeless

The SECUPLUS 210 made of plastic works without a blade. There is no sharp cutting edge on which you could injure yourself. This special protection considerably increases your safety at work.

Bevelled edge

The top edge is shaped exactly so that you can use it to rip paper layers. Condition: The paper is under tension. The curved knife nose paves the way into the roll.

Smooth contact surface

The underside of the SECUPLUS 210 is completely smooth and straight. So you don't lose speed in the roll. You can glide through comfortably – while the splitting work is done further up.

Ergonomic handle

You move the paper splitter forward by pushing. It is very pleasant that the rear part of the tool is rounded. This avoids pressure points and other discomfort.

Split paper without a blade – in single layers.

The SECUPPLUS 210 is ideal for processing roll material. Thanks to a stable edge on the top, it is able to split individual layers of paper from the roll. Since there is no blade, cutting injuries are impossible. And material shrinkage is also kept within limits. Because the ergonomic SECUPPLUS 210 can not only be inserted precisely into the selected layer. It also glides over the surface without leaving any marks.
