SECUNORM GENIAL

NO. 04152

Original size

Easy blade change

The SECUNORM GENIAL blade is so easy to change, it is genius. Open the blade cover, which acts as one half of a double-sided slider. Remove the old blade, and replace with a new. Close the blade cover. Finished!

For left and right handers

Cut with the left hand? Cut with the right? Don't worry! The two-sided slider ensures that both left and right handers can work with the SECUNORM GENIAL.

Robust design

You can feel the quality when you take the SECUNORM GENIAL in your hands. No wonder, the handle is 100% aluminium. It also has a very stable design. You therefore benefit longer from it.

Ergonomically shaped

Have you notice that the SECUNORM GENIAL handle is especially curvy? It fits into your hands in the best possible way. Even if you have to wear protective gloves.

Small eyelet

The SECUNORM GENIAL eyelet is small, but fine. Pull a strap through it and attach your cutting tool however and wherever you want to, so that is it always handy.

A genteel cutter with a great shape.

Do you wear protective gloves at work? Are you looking for a cutting tool that sits firmly and safely in a gloved hand? With a curved slider and an ergonomic shape, the SECUNORM GENIAL is what you're looking for. Cut multi-layer cardboard boxes, film, plastic strapping band, and much more, without your arm tiring and pace slowing. If necessary, feel free to mount a hook blade.

	NO. 5634 0.63 mm, rounded blade tips

Certificates and awards

Application

Safety technology

Automatic blade retraction – a high degree of safety

The automatic blade retraction in the SECUNORM GENIAL ensures a great deal of safety from cut injuries. As soon as you have started cutting, take your thumb off the slider. The blade will then immediately retract into the handle after leaving the material being cut.

THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.

SECUNORM GENIAL
