

SECUMAX 148  
HARD SHELL. SUSTAINABLE CORE.

THE SAFER WAY TO CUT.

**martor**

# SECUMAX 148

## NO. 148001

Original size

### Robust blade head

The plastic-covered blade head is particularly robust with a blade thickness of 0.5 mm. This SECUMAX 148 can therefore take on especially difficult cutting materials in logistics and production.

### Concealed blade

The blade head's two cutting edges are safely concealed to protect users and goods and are yet capable of safely cutting 2-ply cardboard boxes and much more.

### Clever guide surfaces

Another reason why the SECUMAX 148 can cut through cardboard so easily? The guide surfaces located right at the front of the safety knife help you to cut at an angle. Angled cutting means less material resistance!

### Ergonomically shaped

Right handed? Left handed? It's really all the same. The SECUMAX 148 fits perfectly in any hand. Gently arched outer edges, coupled with light ribbing and a low weight, ensure an ergonomic experience.

### Sustainably built

MARTOR prioritises sustainability. SECUMAX 148 is the first MARTOR disposable knife to use only glass fibre reinforced recycled plastic. Its low weight also means materials have been used sparingly.

## Feeling good – in every aspect.

Safety knives that are both disposable and sustainable? Of course! The SECUMAX 148 is made with more than 80% recycled plastic. The glass fibre reinforcement and the robust, 2-cutting edge blade head ensure longer service lives. This makes SECUMAX 148 ideal for tougher cutting tasks. The ergonomic handle and light-weight design will also aid safe and efficient working.

## PRODUCT FEATURES

### Technical features

|                                                                                      |                                    |                                                                                      |                  |

|  | Printable for promotional purposes |                                                                                      |                  |

### Main cutting materials

|                                                                                      |                         |                                                                                       |                                   |
|--------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------|-----------------------------------|
|  | Cardboard: up to 2-ply  |  | Wrapping, stretch and shrink foil |
|  | Plastic strapping band  |  | Bagged goods                      |
|  | Layers of foil or paper |  | Yarn, cord                        |

### Installed blade

» The blade is moulded into the body of the cutter and cannot be changed. Blade thickness 0.50 mm.

### Application

### Safety technology

#### Concealed blade – a maximum degree of safety

The SECUMAX 148 blade is not an open one, but is hidden from people and goods. This provides you with a maximum degree of safety from cut injuries and from damage to goods.

### Certificates and awards

# THE PERFECT FIT FOR ALL. DOES THE PERFECT JOB.

- SECUMAX 148
- › Robust blade head
- › Concealed blade
- › Handle made of recycled plastic
- › For all common cutting materials
- › GS-certified for approved safety
