

SECUNORM 300

THE PERFECT FORM FOR SAFE CUTTING.

THE SAFER WAY TO CUT.

**martor**

# SECUNORM 300

NO. 30000210

Original size

#### Ergonomic handle

The excellent ergonomics can be felt all over the SECUNORM 300, for example in the newly shaped handle which fits comfortably into the hand. Or in details such as the nicely rounded knife end or the non-slip soft grip on the slider.

#### Pleasantly light

The SECUNORM 300's lightness enables you to work efficiently. At only approx. 50 grams, you get a comfortable and versatile professional cutting tool.

#### Sustainably robust

The SECUNORM 300 is made of a glass fibre reinforced, recycled plastic, making it particularly abrasion resistant. Your safety knife therefore stays in top form even when in heavy contact with the cutting material.

#### Controlled cutting depth

The SECUNORM 300 makes light work of all common cutting tasks in logistics and production, etc., as well as high frequency cutting tasks. The shorter cutting depth is especially beneficial for packaged goods.

#### Optimal blade changing

Just pressing the blade change button allows you to remove the plastic insert with the blade. The click-in blade cover and integrated magnet make blade changing even easier and safer.

**Surprisingly light. Convincingly good. With rounded-tip trapezoid blade and 9 mm cutting depth.**

The SECUNORM 300 is the lightweight alternative to the SECUNORM 500. Its handle housing comprises at least 60% recycled plastic and is reinforced with fibreglass. This means that the all-round knife is ready for any number of cuts through cardboard, film, etc. And you are too! Because SECUNORM 300's ergonomic design feels comfortable even after a long day of cutting. The automatic blade retraction protects you, and the blade is quick to change.

## PRODUCT FEATURES

### Technical features

|                                                                                      |                             |                                                                                       |                                  |

### Certificates and awards

### Application

### Safety technology

#### Automatic blade retraction – a high degree of safety

The automatic blade retraction of the SECUNORM 300 guarantees a high degree of safety from cut injuries. As soon as you have started to cut, take your thumb off the slider. Then the blade will retract into the handle immediately after leaving the material being cut.

YOU CAN FEEL THE QUALITY.

SECUNORM 300

- › For high cutting frequencies
- › Light ergonomic handle for left and right handers
- › Made of recycled plastic
- › Automatic blade retraction
- › GS-certified for approved safety
